Intermodal & Loaded Railcar Inspections

Services & Capabilities

- **Intermodal Container Inspections** – Full documentation of load and container condition with photos and detailed reporting.
- **AAR Compliance Verification** – Confirm loads meet AAR guidelines; provide corrective recommendations when necessary.
- **Damage & Void Measurement** – Record any product or container damage and measure lateral/longitudinal voids to assess load stability.
- **Intermodal Container Securement & Load Adjustment** – Perform minor reworks on-site to quickly correct issues, keep loads compliant, and get your freight moving without costly delays.
- **Product Recovery** – Recover and inventory product lost due to attempted theft.
- **Intermodal Door Closure** – Close Doors, document losses and reseal intermodal doors with bolt seals to ensure freight remains secure through final delivery.
- **Open Top Load Inspections** – Verify compliance with AAR diagrams/figures, supported by photo evidence.
- **Derailment Response** – Deliver comprehensive documentation of involved railcars, including condition assessments and damage estimates.
